WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT : AUSTRALIA

PRELIMINARY ESTIMATES - DECEMBER 1969

This preliminary statement of Wage and Salary Earners in Civilian Employment will be followed in due course by the monthly bulletin Employment and Unemployment, which will give information in greater detail. The figures shown are subject to revision. Revised seasonally adjusted estimates are being prepared and will be issued as soon as possible.

The estimates contained herein are based on benchmarks derived from the results of the population census of June 1966. They are obtained from three main sources, namely (a) current pay-roll tax returns, (b) current returns from government bodies, and (c) some other current returns of employment (e.g. for hospitals); the balance, i.e. unrecorded private employment, is estimated. Month-to-month changes shown by current returns are linked to the benchmark data to derive the monthly estimates. At June 1966 recorded employment obtained from the foregoing sources accounted for about 85 per cent of the total number of employees in the industries covered, as determined by the census.

The figures in this statement relate only to civilian wage and salary earners, not the total labour force. They therefore exclude employers, self-employed persons, unpaid helpers and defence forces. Also excluded, because of the inadequacy of current data, are employees in agriculture and private domestic service, and some part-time employees.

Any discrepancies between totals and sums of components in tables are due to rounding.
